

Expanding Learning Horizons

# Connect, Communic8 and Collabor8

## New media technologies with Office 365

### A full-day Professional Learning Workshop

New media literacies are bringing about transformation in the way we communic8, connect with each other and globally collabor8. As technologies become more sophisticated and wide spread, the ideation of New Media is placing new demands on learner's attention and critical and creative cognition. Office 365 is a platform enabling new ways for our learners to come together and collabor8, finding other avenues of engagement in the changing aspects of communication and bringing new levels of transparency to classroom practice.

### About Expanding Learning Horizons

Expanding Learning Horizons offers professional learning programs and specialist coaching to schools and teachers. Our programs explore, on a deeper level, the ways technology can strengthen classroom curriculum, provide a bridge between theory and practice, and deliver changes to students' learning, to better equip them with 21st Century capabilities.

### About the Office 365 Workshop

Join one of our Expanding Learning Horizons consultants to explore how you and your students can use Office 365 apps and applications to connect, communicate and collaborate in your education context. This full-day professional learning workshop is suited to both primary and secondary teachers of all abilities and covers:

#### Connect

- ✓ Connect your learners and their learning with experts outside the classroom by using Skype for Business and Skype in the Classroom
- ✓ Use Yammer to connect with colleagues, students, parent community and external networks

#### Communic8

- ✓ Create and share engaging collaborative presentations using Sway
- ✓ Share content via O365 Video
- ✓ Demonstration of how to design virtual classrooms in Sharepoint

#### Collabor8

- ✓ Collaborate with colleagues and enable student collaboration through Office Online
- ✓ Tracking collaborative documents and projects in Delve
- ✓ Allow OneNote and the Class Notebook Creator to help you create, organise and share content as well as collaborate virtually while lightening cognitive load through its multi-modal tools
