No, we provide desktops for each student — **9%**

## COMMITMENT TO 1-TO-1 DEEPENS

In 2013, schools are significantly **more likely to be committed to a 1-to-1 student computer ratio**, regardless of continued goverment funding

### MOST COMMITTED

**78%** of Victorian schools

**74%** of Western Australian schools

**75%** of schools with 1,000+ students

**73%** of metropolitan schools

## ABOUT THIS INFOGRAPHIC

These findings are taken from **Management of IT in Non-Government Schools 2013**, Computelec's second annual survey. Research was conducted November 2012 to February 2013, receiving responses from 228 Australian schools representing:

**21%** of **independent schools** and **17%** of **Catholic schools** offering secondary education
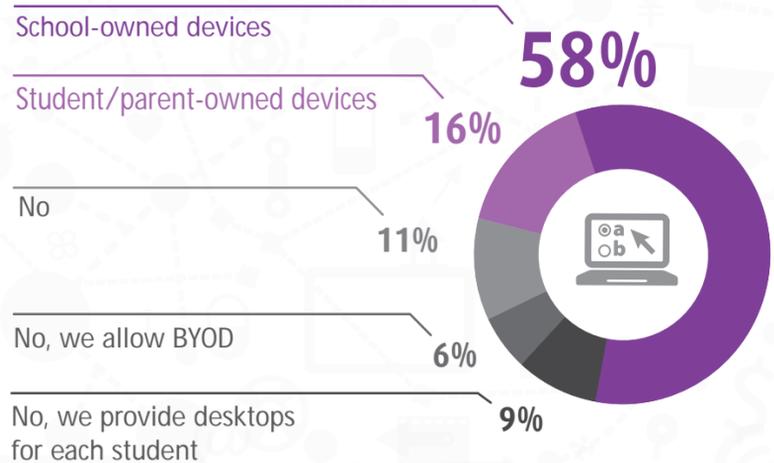

As such, it provides an authoritative overview of trends in educational IT over the past two years and plans for 2013 – making it a useful benchmark for schools wanting to understand where they stand in comparison with others of similar size, type and location.
